

Aerotropolis Integrated Stormwater Scheme

Final plans now available

Sydney Water is pleased to announce the Aerotropolis Integrated Stormwater Schemes for Wianamatta Badgerys, Cosgroves and Duncans Mulgoa are now finalised.

Listening to your feedback

In 2025, we released the draft Integrated Stormwater Scheme plans for Wianamatta Badgerys, Cosgroves and Duncans Mulgoa. Thank you to everyone who shared feedback on the Aerotropolis draft Integrated Stormwater Scheme Plans. We received more than 100 submissions from private landowners, developers and other stakeholder groups.

Your feedback has helped shape final scheme plans, refine infrastructure sizing and locations and ensure all technical, environmental and regulatory requirements are met.

Scheme plan changes

The plans have now been updated from the draft versions based on technical assessments and community feedback. We have reached out to property owners directly where any changes may affect their property.

You can view the final scheme plans on the interactive map on our website and download the technical documents.

Next steps

We appreciate your patience throughout the development of the scheme plans. We are now preparing the Development Servicing Plan (DSP), which will be exhibited in Q2 this year.

If you are a developer or are planning development in the area, please visit the project page using the QR code to stay informed about the DSP process.

Get in touch

We are committed to keeping you informed every step of the way. For more information, visit the project page, scan the QR code, or contact us directly.
